

STAFFING RESOURCES REQUESTS: SEARCH ENHANCEMENTS

THE WHY

The ability to find the right resource to fulfill a project role is critical to a PS organisation and skills are a key factor in the decision making process.

A mis-match on skills leads to

1. Lost productivity
2. Low morale for resource and colleagues
3. Customer dissatisfaction
4. Additional costs from adding or swappin resources midway through a project.

The enhanced Search Criteria section on the Assign Resource page now supports skill sets and allows searching for resources using minimum skill ratings.
